

- Root variables: a way to use variable in CSS
- [yoksel.github.io/Flex-cheatsheet/](https://yoksel.github.io/Flex-cheatsheet/)

## Wireframes 17/6/25

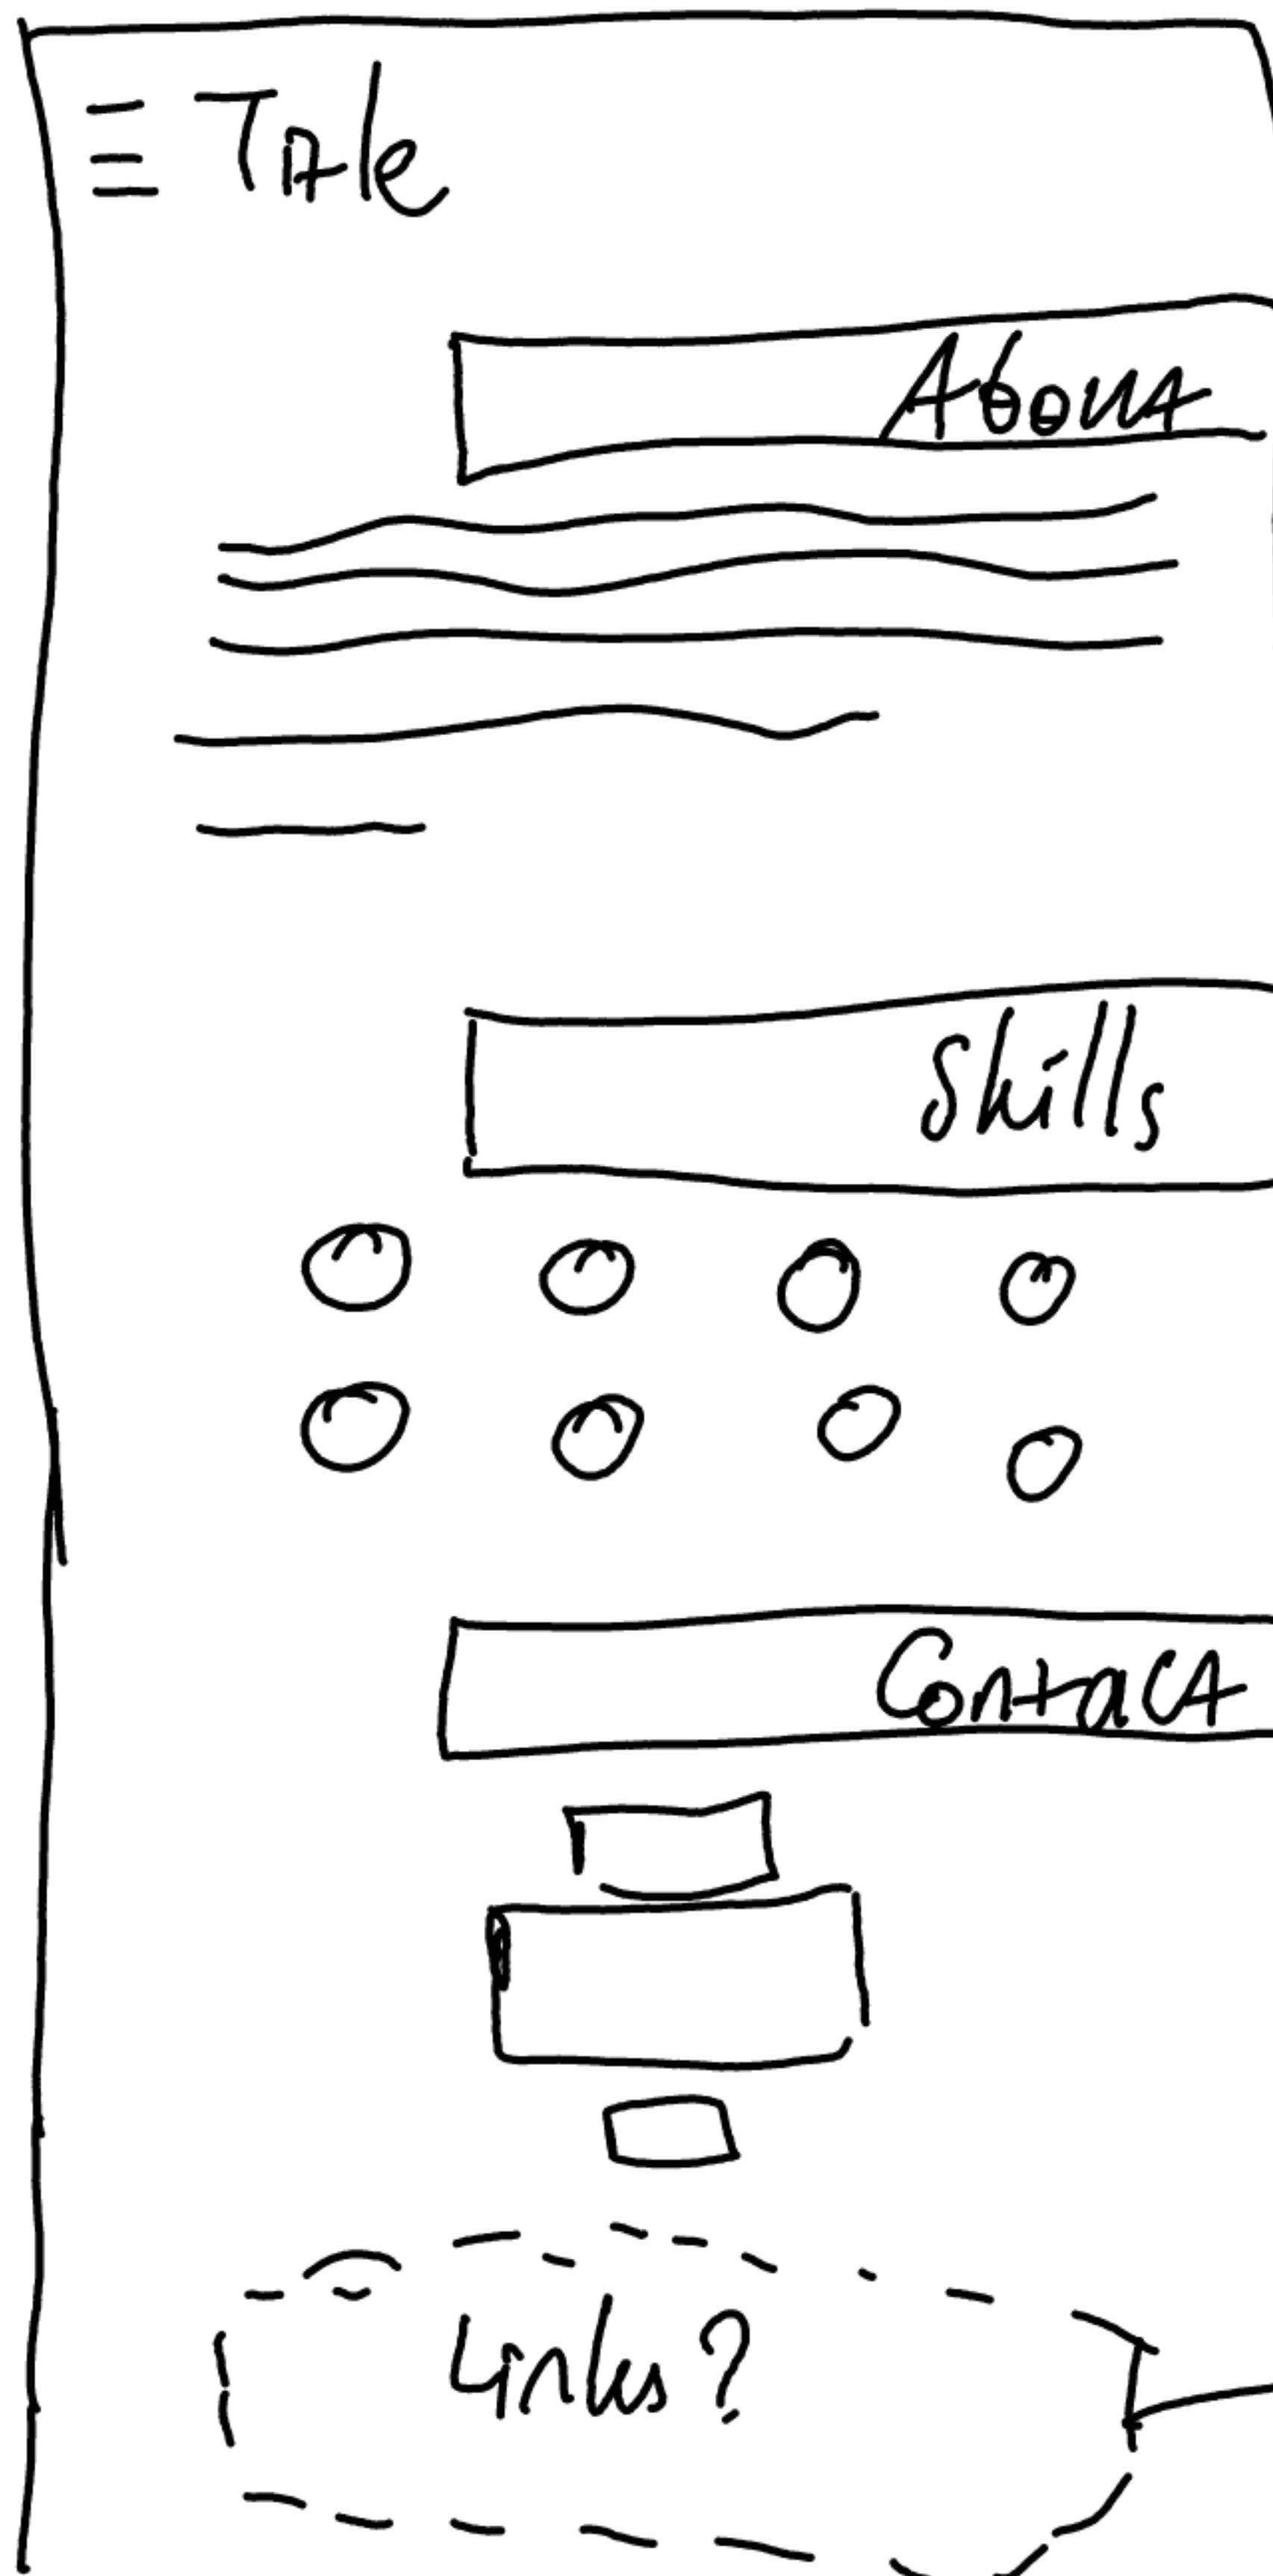

⇒ Remember to develop mobile first

- o I think 1 page with sections is OK
- o Just rely on colours...  
no image
- o Pick another font for the name / title, headers

- Possible font pairings:
  - Foldit
  - Rubik Maze
  - Neonderthaw

Let's try again

→ unsure about alignment

→ centered

→ centered

→ What's the copyright rule?
